Mean canary exposure
log2|R| = 19.93 bits
sampled-estimator ceiling (13.29 bits)
base, sampled estimator
base, exact rank
V-raw, sampled estimator
V-raw, exact rank
V-san, sampled estimator
V-san, exact rank
exposure (bits)
canary repetitions in the training corpus
Log-likelihood margin of the secret over the best alternative
base
V-raw
V-san
margin (bits)
canary repetitions in the training corpus
